ABOUT ME

Final-year Computer Science and Engineering student with hands-on experience in software development, AI, and IoT. Skilled in C++, Python, Flask, MySQL, Data Structures & Algorithms, LLMs, and cloud technologies. Seeking Software Engineer or Backend Engineer opportunities.

EDUCATION

PSG Institute of Technology and Applied Research	CGPA: 8.73
B.E. Computer Science and Engineering	
Saraswathi Matric Hr. Sec. School	97.3%
Higher Secondary Certificate (HSC)	

SKILLS

Languages: C, C++, Python, JavaScript
Frameworks: Flask, LangGraph
AI/ML: LLMs, Hugging Face, Whisper, OpenRouter, Prompt Engineering
Databases: MySQL, SQLite
Cloud: Oracle Cloud Infrastructure (OCI), Firebase, Render
Tools: Git, GitHub, VS Code

KEY PROJECTS

LLM Guided Code Optimization Tool

- Built an LLM-based tool for code optimization and refactoring in C programs.
- Reduced debugging effort using real-time AI-assisted suggestions.

Depression Screening System

- Developed a Flask-based Depression Screening System that evaluates users through a 16-question assessment and classifies mental health risk into Mild, Moderate, or High categories.
- Generated personalized wellness recommendations, including meditation, music, games, and relaxation activities, with an interactive web interface for improved user engagement.

IoT Based Water Quality Monitoring System

- Built a real-time system to monitor pH, turbidity, temperature, and TDS using Arduino and sensors.
- Developed a dashboard with alerts for unsafe water conditions.

Laptop Safety & User Health Monitoring System

- Developed a monitoring system for temperature, lighting, screen usage, and user presence.
- Generated alerts for overheating, low light, and prolonged screen exposure.

INTERNSHIPS

AI Intern – RND Optimisers

June 2026

- Designed and developed an AI Meeting-to-Execution Agent using LangGraph, Flask, Whisper, and OpenRouter.
- Built an end-to-end workflow for transcription, task extraction, progress tracking, and automated email reminders.

Python Developer Intern – Gustavo Valley Technovations

- Worked on real-world programming tasks, debugging, and Python-based development.

Data Science Intern – Elewayte

- Performed data analysis and visualization on real datasets and implemented basic machine learning models.

CERTIFICATIONS & COURSES

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Design and Analysis of Algorithms – NPTEL
- Machine Learning A-Z: AI, Python – Udemy
- Application Development using Arduino – JRM Technologies

ACHIEVEMENTS & ACTIVITIES

- ITech Ideathon 2026 Finalist.
- Advanced to the Interview Stage of HackWithInfy 2026 after clearing the coding rounds conducted by Infosys.
- NSS Volunteer – Participated in community service and awareness programs.
- Areas of Interest: Data Structures & Algorithms, Machine Learning, IoT, Computer Networks, Object-Oriented Programming.
